

# Demystifying AI: A Strategy for Nonprofit Leaders

**Presented by: Bill Hudson, Executive Director, Family Child Care Alliance of Maryland**

# About Me (according to Alice)

AI

A vibrant, stylized illustration of a computer keyboard. The central focus is a large, 3D green button with the words "DON'T PANIC" written in a bold, white, sans-serif font with a black outline. The button is slightly raised and has a soft shadow. Surrounding it are several other buttons in various colors: blue, orange, red, and purple. The background is a warm, textured orange. The overall style is reminiscent of mid-century modern graphic design.

**DON'T  
PANIC**

*AI is advancing faster than any technology in human history.*

# The “Toaster” Dilemma

## Narrow AI

I see you bought a toaster. Would you like to buy... another toaster?

## Generative AI

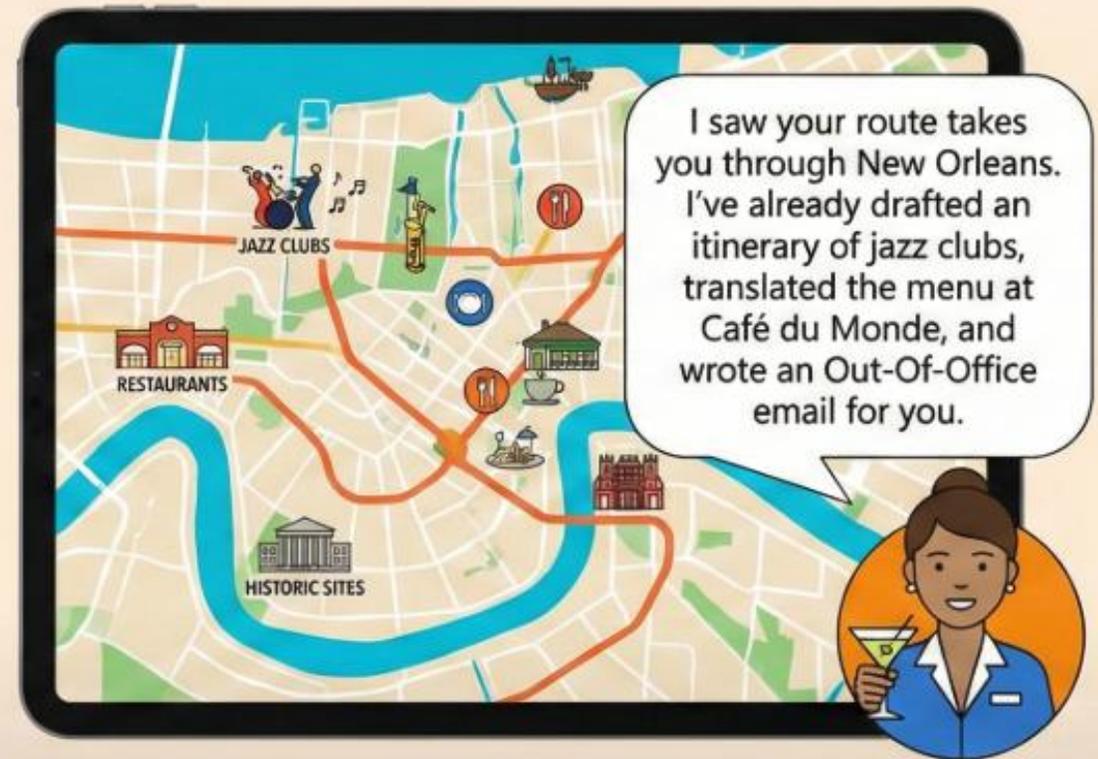

# The Vacation Planner: Routing vs. Experience

## Narrow AI

My job is to get you from Point A to Point B efficiently. I don't care what you do when you get there.

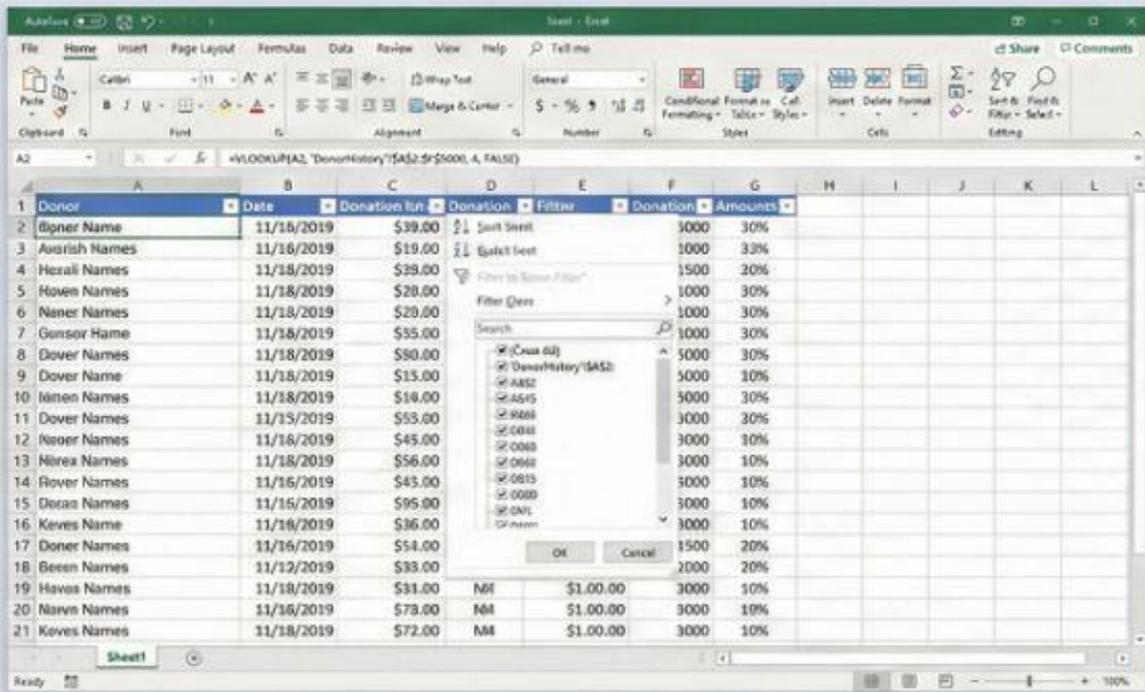

## Generative AI

I'm your personal travel concierge. I don't just find the route; I plan the entire experience based on your interests.

# The Donor Data Challenge: Manual Crunching vs. Instant Insight

## Narrow AI

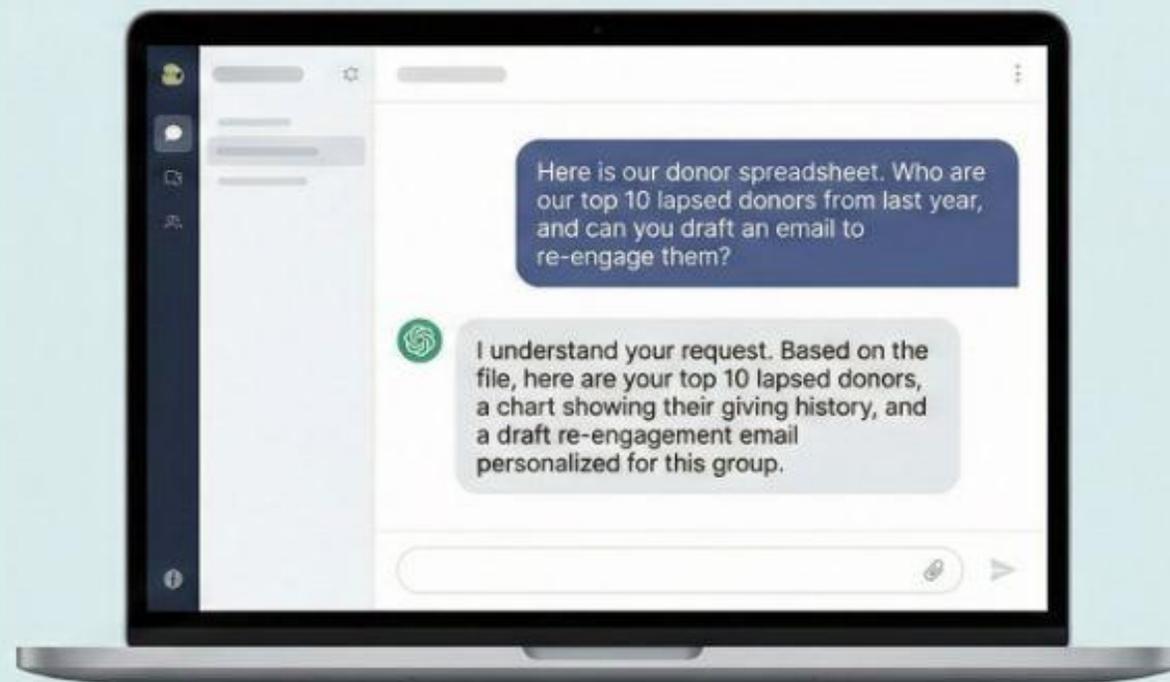

The screenshot shows a Microsoft Excel spreadsheet with a table of donor data. The table has columns for Donor, Date, Donation list, Donation, Filter, and Amounts. A filter dialog box is open over the 'Filter' column, showing a search bar and a list of filter options. The data in the table is as follows:

Donor	Date	Donation list	Donation	Filter	Amounts
Donor Name	11/18/2019	\$39.00	Smart Street		3000 30%
Aurish Names	11/18/2019	\$19.00	Smart Street		1000 33%
Hexall Names	11/18/2019	\$39.00	Smart Street		1500 20%
Noven Names	11/18/2019	\$20.00	Smart Street		1000 30%
Nener Names	11/18/2019	\$20.00	Smart Street		1000 30%
Gunsor Name	11/18/2019	\$55.00	Smart Street		1000 30%
Dover Names	11/18/2019	\$80.00	Smart Street		5000 30%
Dover Name	11/18/2019	\$15.00	Smart Street		5000 10%
Imen Names	11/18/2019	\$18.00	Smart Street		5000 30%
Dover Names	11/15/2019	\$55.00	Smart Street		3000 30%
Novor Names	11/18/2019	\$45.00	Smart Street		3000 10%
Nbrex Names	11/18/2019	\$56.00	Smart Street		3000 10%
Rover Names	11/16/2019	\$45.00	Smart Street		3000 10%
Doxas Names	11/16/2019	\$95.00	Smart Street		3000 10%
Keres Name	11/18/2019	\$36.00	Smart Street		3000 10%
Doner Names	11/16/2019	\$54.00	Smart Street		1500 20%
Been Names	11/12/2019	\$33.00	Smart Street		2000 20%
Hayas Names	11/18/2019	\$31.00	NR	\$1.00.00	3000 10%
Narvn Names	11/16/2019	\$73.00	NR	\$1.00.00	3000 10%
Koves Names	11/18/2019	\$72.00	NR	\$1.00.00	3000 10%

I can process your data, but only if you speak my language. You must first master my complex functions, pivot tables, and database queries before I can reveal any insights.

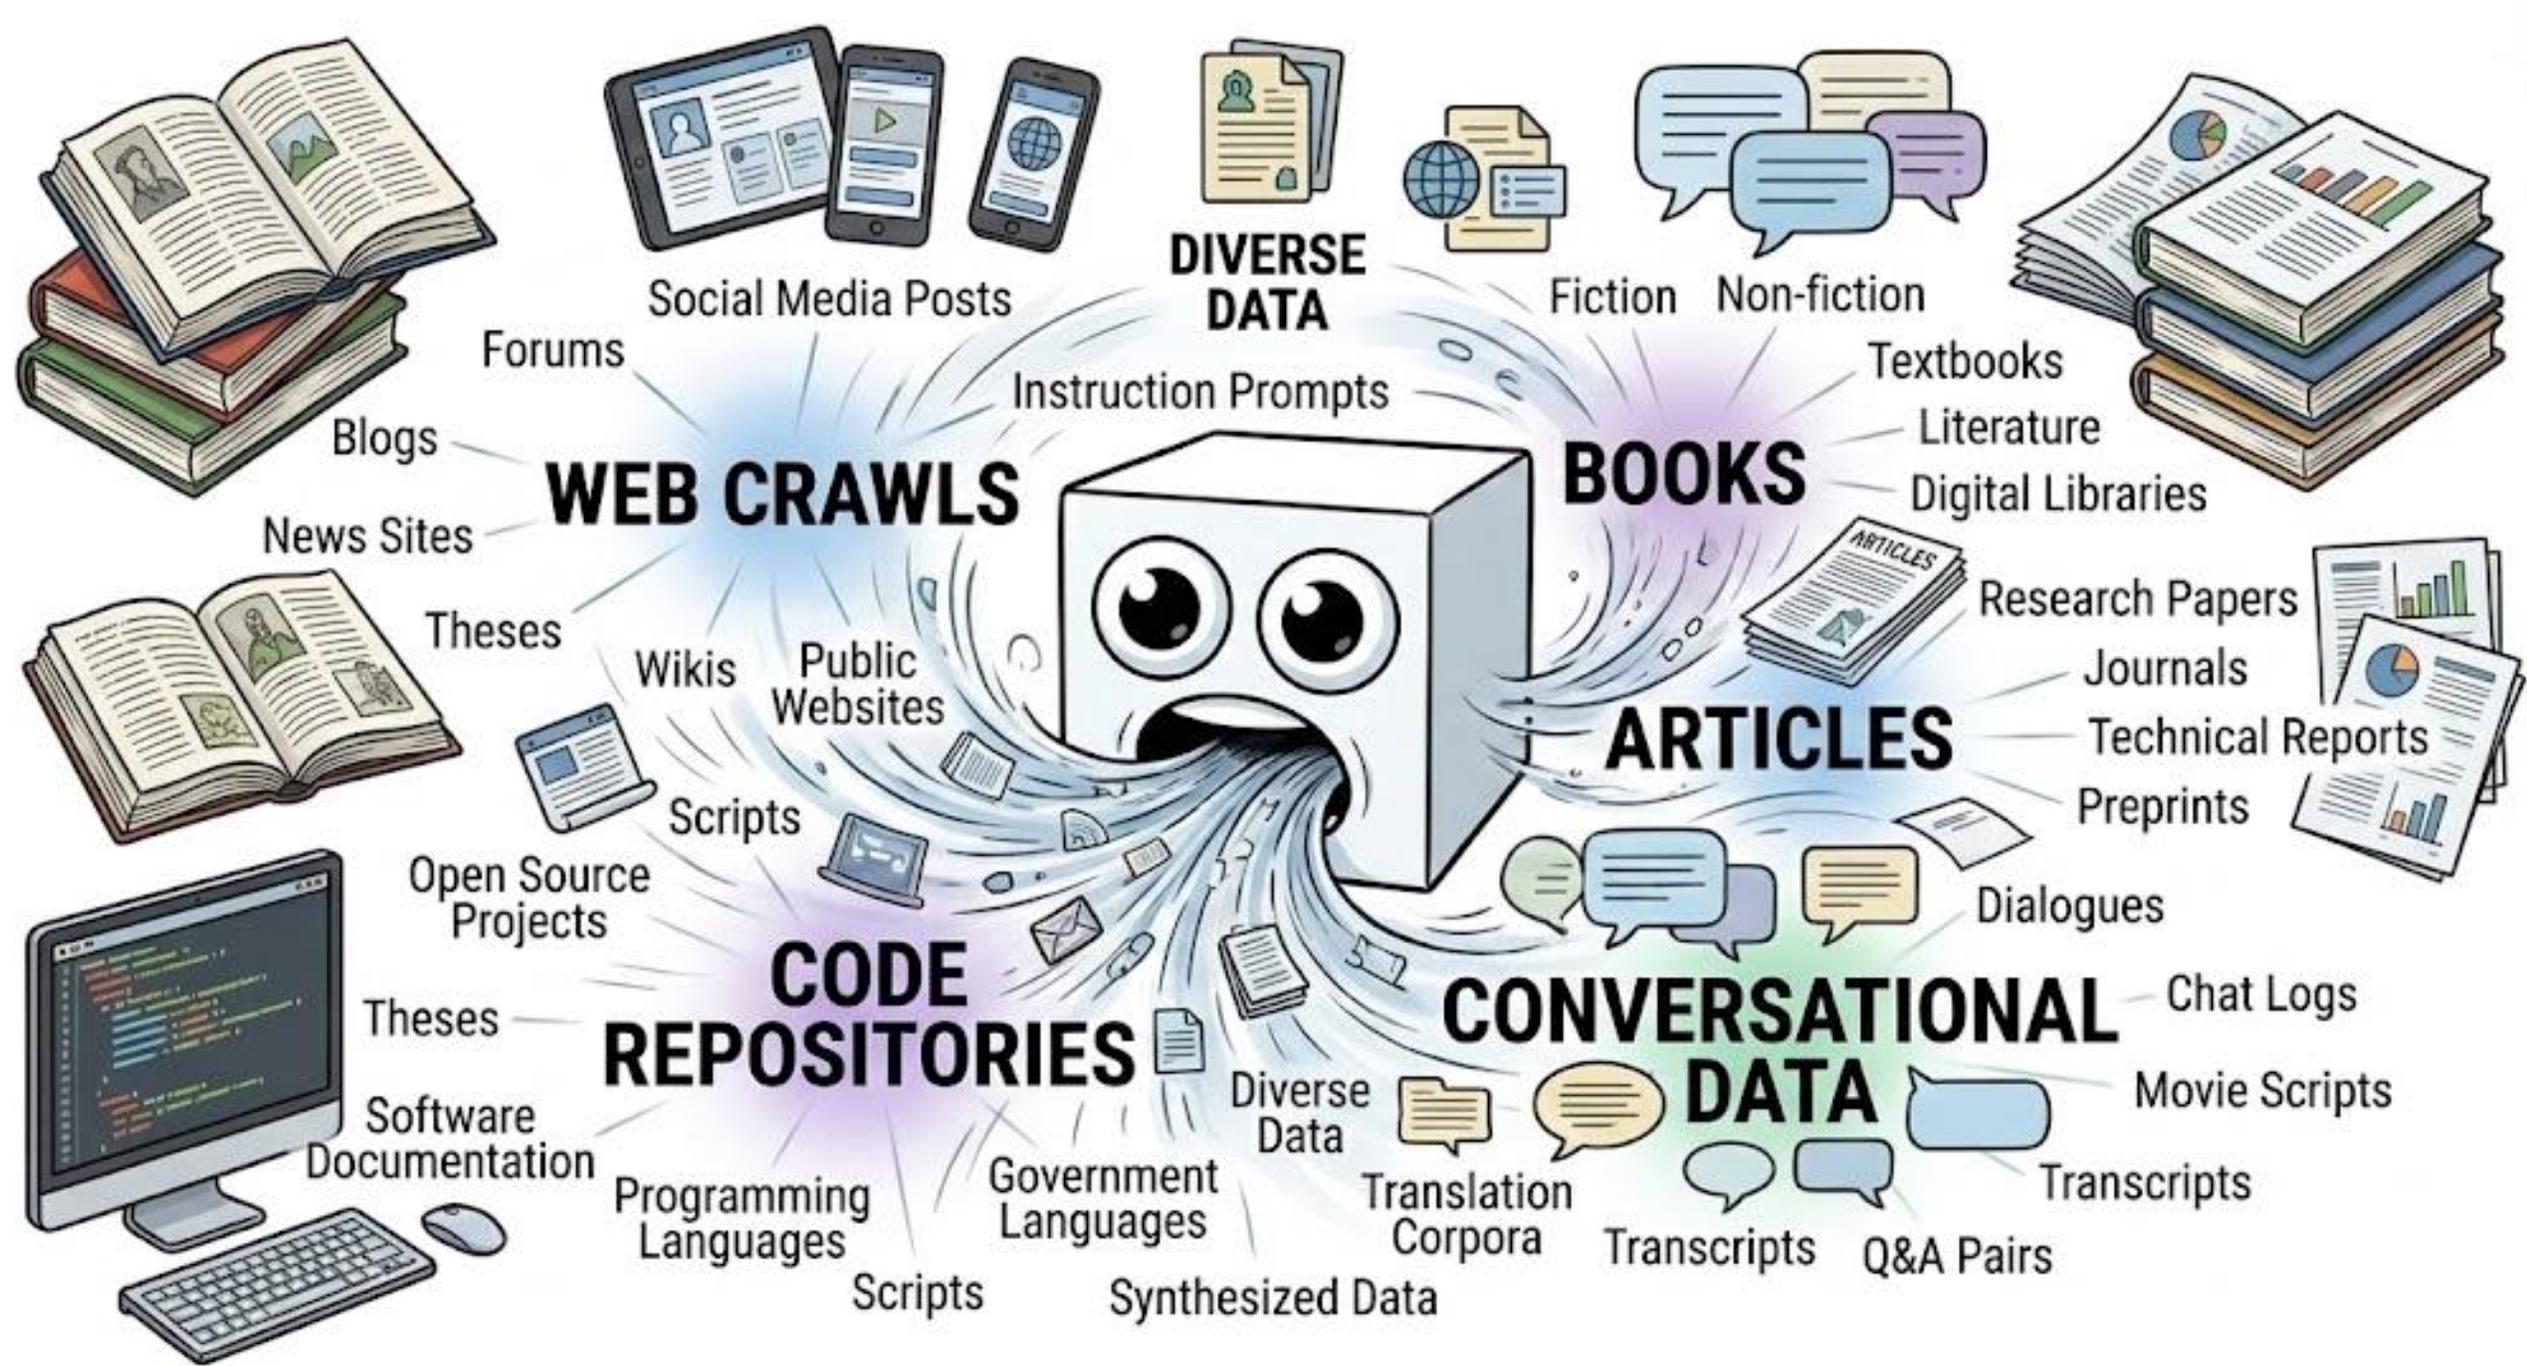

## Generative AI

I understand your intent. You uploaded a messy file and asked a simple question. I have already identified your top lapsed donors and drafted a re-engagement email for you.

# Leading Large Language Models (LLMs) in the Marketplace

- Note: Chatbots versus models (ChatGTP vs GPT-4)
- ChatGPT by OpenAI
- Claude by Anthropic
- Gemini by Google

# AI ADOPTION ADVENTURES!

# AI Adoption Level 1: Asking Questions

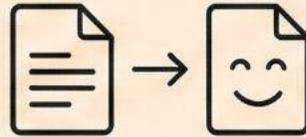

# AI Adoption Level 2: Writing Help

## Drafting Emails & Updates

Create first drafts of announcements and communications quickly.

## Rewriting for Clarity & Tone

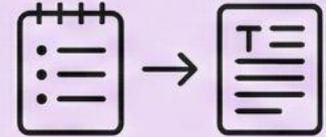

Improve text for clarity, warmth, or professionalism.

## Improving Tone for Audiences

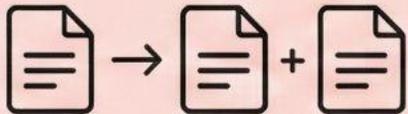

Tailor language for families, funders, or the board.

## Turning Notes into Paragraphs

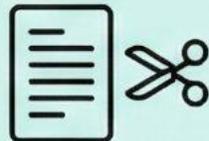

Convert rough bullet points into cohesive text blocks.

## Format Converter & Simplifier

Convert to scripts, talking points, and simplify reading level.

## Shorten or Simplify Text

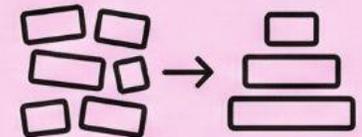

Reduce length and complexity for desired reading levels.

## Polishing Grant Narratives

Refine and enhance sections of grant proposals.

## Tightening & Reorganizing Text

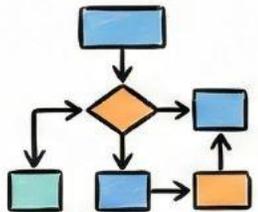

Improve structure, flow, and readability.

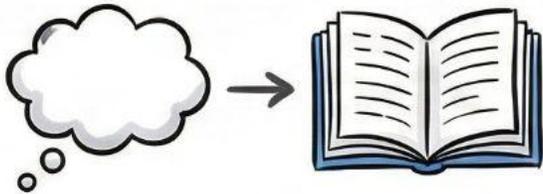

# AI Adoption Stage 3: Creating New Content (AI as Co-creator)

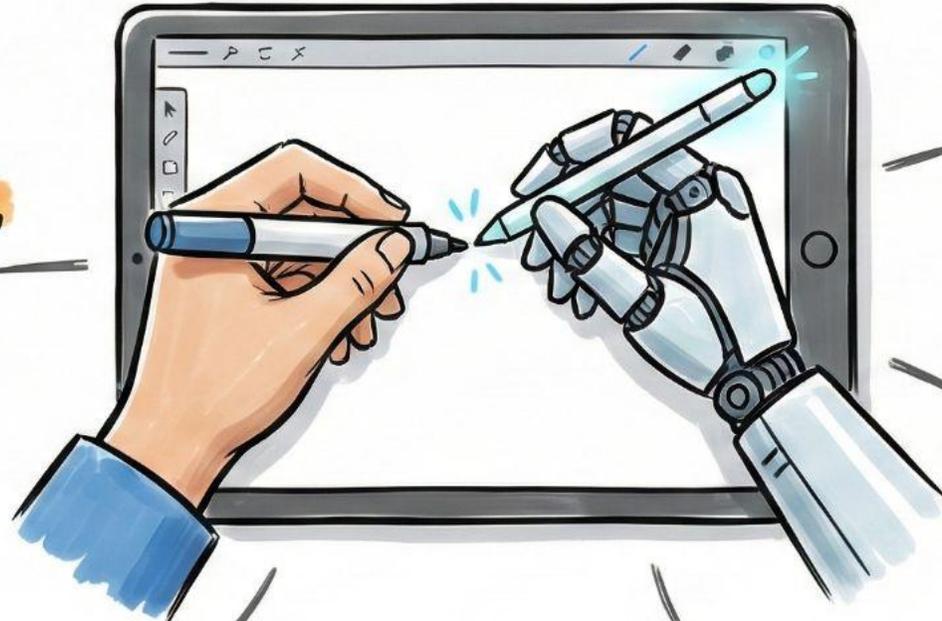

Draft first versions of complex documents (memos, letters, speeches)

Build frameworks, outlines, and structured plans

Turn rough concepts into organized narrative or teaching materials

Generate creative artifacts: analogies, metaphors, examples

Create graphics, icons, simple diagrams, and visual metaphors

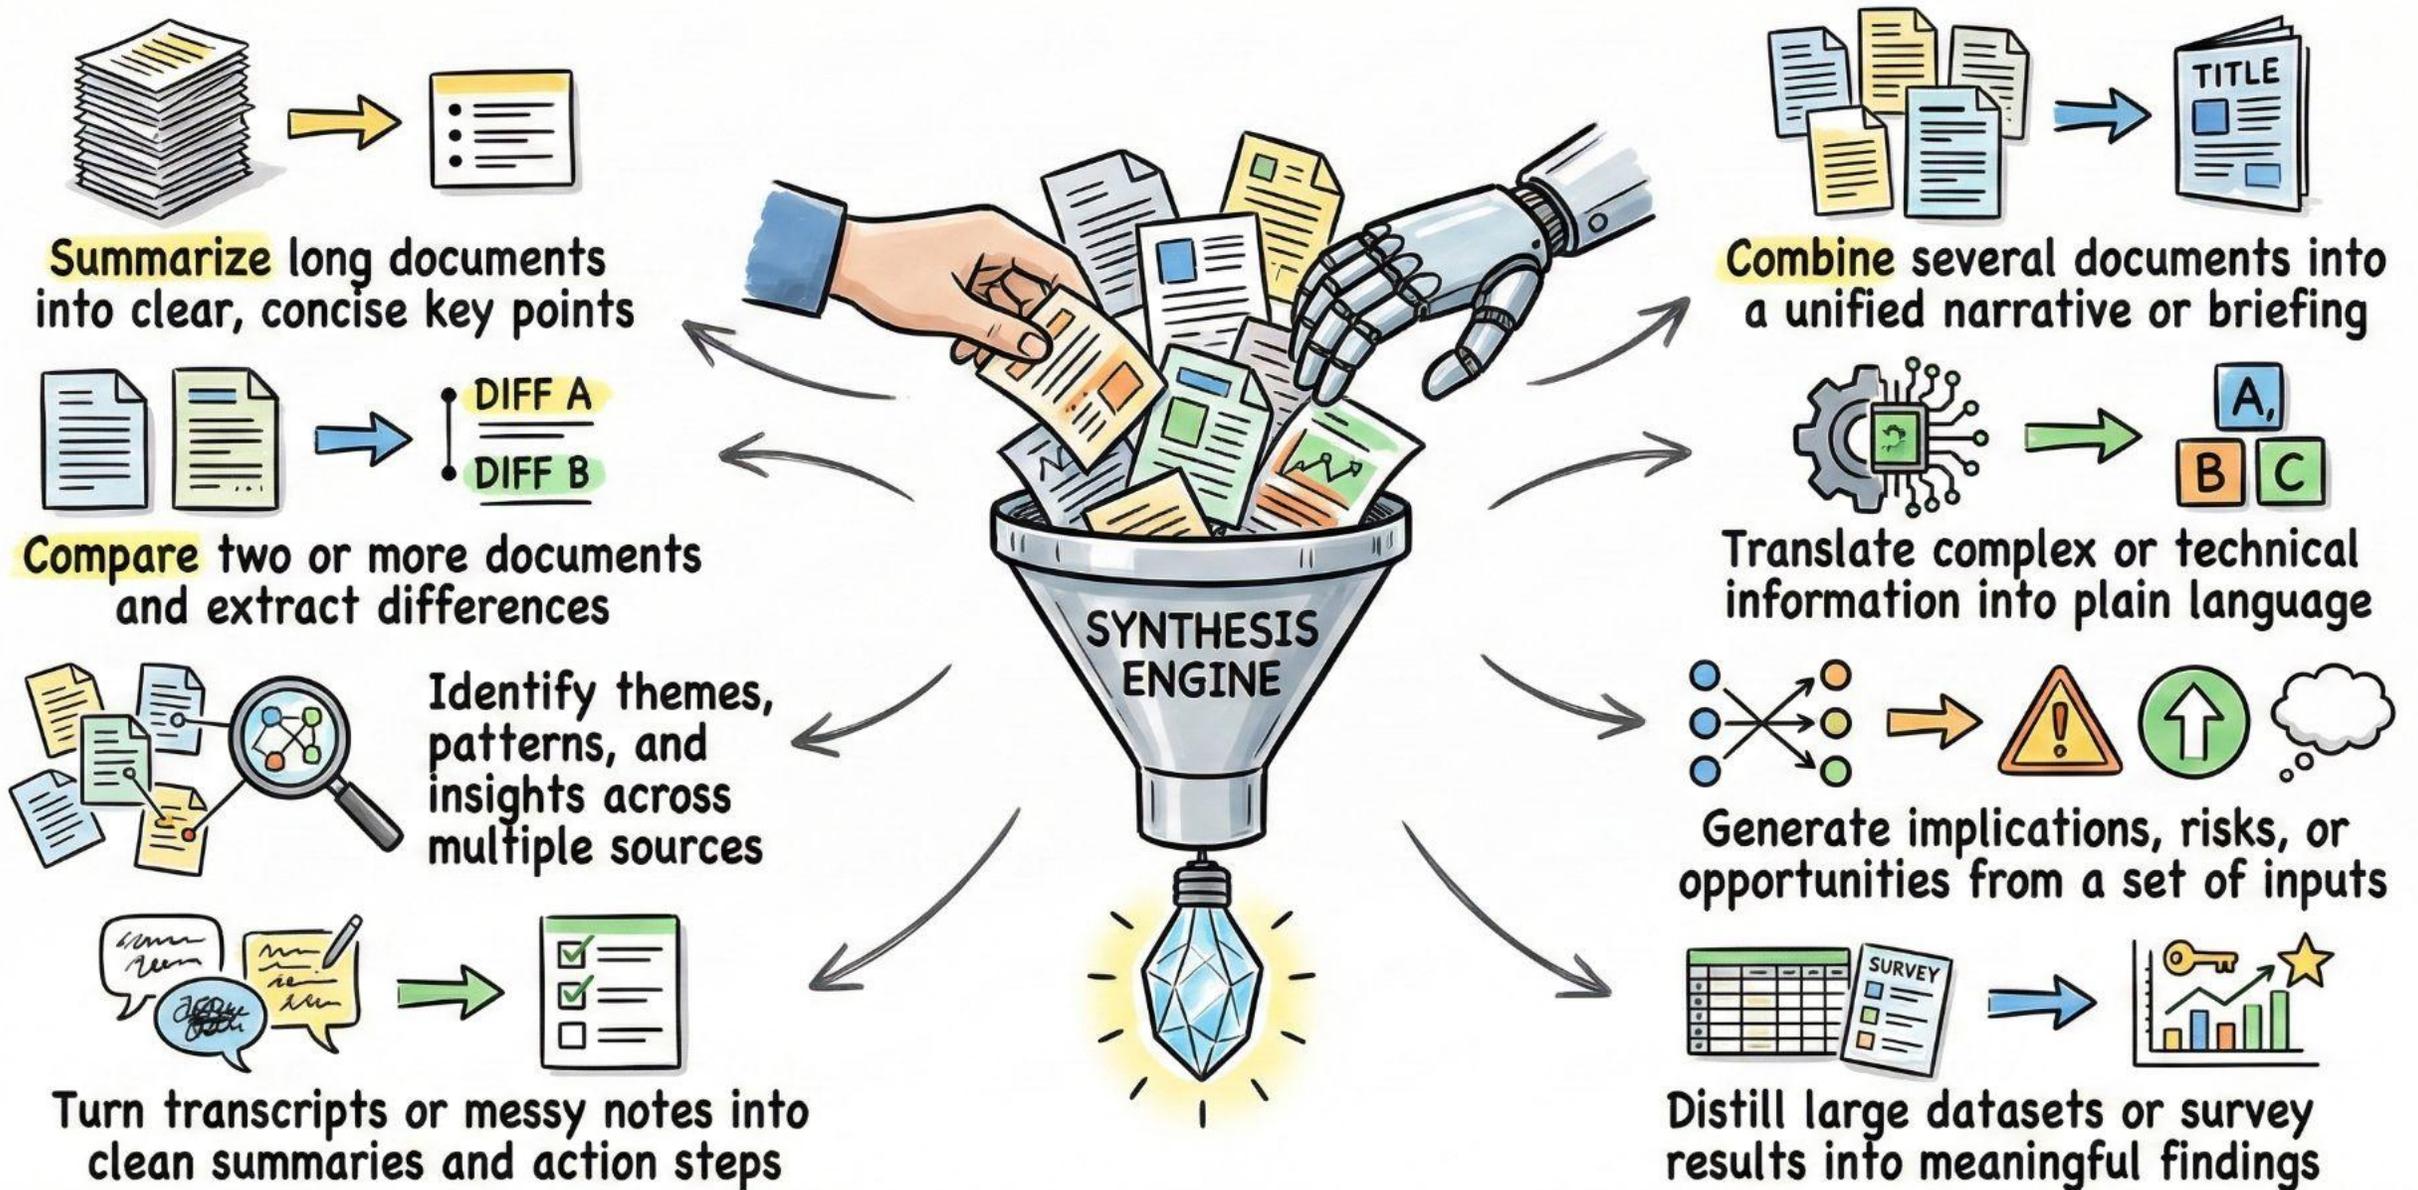

Generate images for presentations, websites, social posts, and handouts

Produce simple videos or video drafts (avatars, short clips, explainers)

# AI Adoption Stage 4: Synthesis (AI as Sense-Maker)

# AI Adoption Stage 5: Strategic Partner (AI as a collaborator in thinking and decision-making)

## EXPLORATION & ANALYSIS

Explore strategic options and compare potential pathways

Pressure-test assumptions and reveal blind spots

Identify risks, unintended consequences, and tradeoffs

Model alternative framings for funders, policymakers, or stakeholders

## CLARITY & ACTION

Strengthen arguments by clarifying logic and structure

Translate complex, high-level ideas into actionable steps

Generate multiple approaches to a problem for leadership consideration

Support scenario planning and decision-making under uncertainty

# Stage 6: Directing Agents: “AI as an active worker in your organization”

## SUPERVISION & WORKFLOWS

- **Supervise** AI agents that perform multi-step tasks independently.

- **Create custom workflows** that run on their own (research → draft → summary → formatting).

- **Monitor** agent decision-making and correct errors or drift.

- **Connect** agents to external tools (email, calendars, documents, CRMs).

## DEPLOYMENT & AUTOMATION

- Enable staff to “hire” digital assistants tailored to their roles.

- Build simple agents **without programming** (natural-language configuration).

- Use AI to **generate simple software or automations** without coding.

- Deploy agents to maintain recurring tasks (news scans, inbox triage, draft generation).

# Empowering Nonprofits with AI

# Key Components and Relationships for Nonprofit Success

# Your First Step: Identify a Problem Worth Solving.

# Final Thoughts: Managing the "Caffeinated Squirrel"

Things to keep in mind when adopting AI:

AI can be like a squirrel on Red Bull

Pay for one LLM, use a second one for verification

Stakeholders want to hear from you, not your AI

If you are not a one-person shop, AI use policies will be needed

Be transparent on your documents and website

AI can be wrong, and confident

Don't outsource your thinking

**Be aware of agreeability!**

# Alice's View
